INTERNSHIP & ITS IMPORTANCE

The rise in global competition has prompted organizations to devise strategies to have a talented and innovative workforce to gain a competitive edge. Developing an internship policy is an impactful strategy for creating a future talent pool for the industry. The Internship program not only helps fresh pass-outs in gaining professional know-how but also benefits, corporate on fresh perspectives on business issues and even discovering future business leaders. The interaction of Technical Institutions with the industries has been restricted to the level of faculty communications and 2 to 4-hour industrial visits by the students generally. The institutions are under a great stress to renew education offered by them, to be as close as possible to the industrial requirement and expectations. Competition in the job sector is rising exponentially and securing entry-level jobs is getting very difficult, as the students passing out from technical institutions lack the experience and skills required by industry.

OBJECTIVE OF INTERNSHIP

Internships are educational and career development opportunities, providing practical experience in a field or discipline. They are structured, short-term, supervised tasks often focused around particular tasks or projects with defined timescales. An internship may be compensated, non-compensated or some time may be paid. The internship has to be meaningful and mutually beneficial to the intern and the organization. It is important that the objectives and the activities of the internship program are clearly defined and understood. Virtual Internships meeting below mentioned objectives in the present document can also be permitted provided the offering agency is a MNC or globally reputed and leading organization offering virtual Internships.

Following are the intended objectives of internship training:

- ❖ Will expose Technical students to the industrial environment, which cannot be simulated in the classroom and hence creating competent professionals for the industry.
- ❖ Provide possible opportunities to learn, understand and sharpen the real time technical/managerial skills required at the job.
- ❖ Exposure to the current technological developments relevant to the subject area of training.
- ❖ Experience gained from the 'Industrial Internship' will be used in classroom discussions.
- ❖ Create conditions conducive to quest for knowledge and its applicability on the job.
- ❖ Learn to apply the Technical knowledge in real industrial situations.
- ❖ Expose students to the engineer's responsibilities and ethics.
- ❖ Familiarize with various materials, processes, products and their applications along with relevant aspects of quality control.
- ❖ Understand the social, economic and administrative considerations that influence the working environment of industrial organizations

INTERNSHIP CERTIFICATE

INTERNSHIP LETTER

Date-14-Feb-2022

TO WHOM IT MAY CONCERN

ABOUT COMPANY

MACK Pharmatech has been working continuously in the field of manufacturing Pharma and lab equipments since 1999. Having begun as MACK Equipments, we have now evolved to MACK Pharmatech because true continuity means more than merely the survival of a business.

It means the continuation of an environment that makes the business enjoyable to work in, work for and to be part of all concerned. It also means constant innovation and the ability to take stock of all the experience and insight and fuse it into a more effective company for the benefit of our clients. A blend of young and truly professional enthusiasts driven by a desire to succeed, we take pride in our professionalism.

The team consists of reputed engineers with decades of experience. The production team comprises vibrant and qualified professionals. The marketing team consists of energetic go getters.

The highly experienced and dedicated teams have put in several thousand man hours to come up with truly unique and innovative features. We envisage the realization of these goals in the near future as our system evolves and surges forward in the servicing age.
